

## VOXDALE – Engineering & Innovation Excellence

**VOXDALE (Antwerp, 2005)** is a design, engineering and research agency that focuses on innovation, concept generation, feasibility studies and engineering, for system design, product development and industrial installations.

Virtual simulation tools for structural analysis, thermal management and flow optimization ensure a dedicated approach that results in products and systems with more performance and less risks.

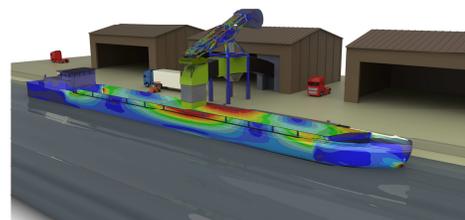

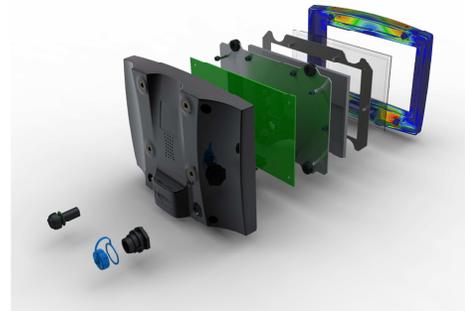

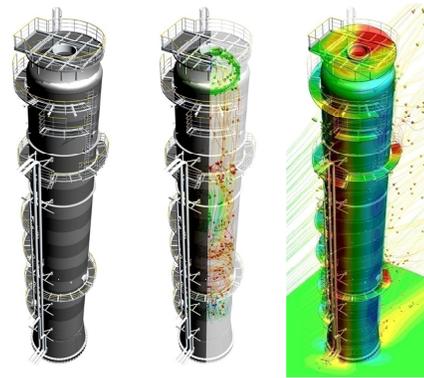

Typical sectors: Medical, Industrial, Nuclear, Space & Aerospace, etc ...

### Services include:

- Concept generation – system & concept level
- Design and Engineering
- Feasibility studies, simulation, optimization
- CFD, FEA
- Prototyping & 3D printing
- Verification testing, validation & industrialization

### References

ESA, Qinetiq, Barco, Agfa, Reynaers, Siemens ADB, Cofely Fabricom, Stuvex, Eoluz, GDF Suez, ...
